Detergent Free Cleaning

## CLEANING WITHOUT HARMING

Chemspec is pleased to introduce DFC 23 Calcium Lime & Rust Remover and DFC 5 Organic Bathroom Cleaner - the world's first bathroom cleaners based entirely on food based ingredients.

**DFC 23 Calcium Lime & Rust Remover** can replace all of your corrosive, acid based project type cleaners. It is made entirely from FDA food approved ingredients and will gently loosen and remove all of your hard to clean water stains, calcium buildup, organic soils and other biofilms.

**DFC 5 Bathroom / Organic Cleaner** is your maintenance product and is more effective at completely removing washroom organic soils, water deposits, soap and dried urine deposits and helps prevent biofilm build-up in and around urinals and toilets than cream scours and detergent based bathroom cleaners.

The DFC line of food based cleaners does not contain: dangerous acids, surfactants, builders, solvents, disinfectants, oxidizers, or abrasives. They are based entirely on ingredients that are listed by the FDA as considered safe for human consumption.

With this exciting new technology there is no longer a need to use harmful or corrosive cleaning agents . DFC products will not damage acrylics, porcelain, chrome, stainless steel or grouted surfaces that are found in today's washrooms.

**Clean All Of The Dirt From Your Washrooms Without Hazardous Cleaning Products.**
